

# Marker Light, Two-Function (Helmet-Mounted)

## HEL STAR 4 EXO®

HEL-STAR 4 EXO® offers high visibility, durability, waterproofing, and easy battery replacement in a low profile, snag free footprint.

The two operating functions can be user defined in a variety of colors & IR, flash rates and light intensity options. It stays true to the original low profile design for rescue, airborne, K9 and other confined space operations.

Available in Black or Tan.

### HEL-STAR 4 EXO® Models

Model	Function M-1	Function M-2
HS-402X	Green (Steady)	IR (Flash)
HS-403X	White (Flash)	Green (Steady)
HS-404X	White (Flash)	IR (Flash)
HS-405X	Green (Stdy)+White (FL)	Green (Steady)
HS-406X	IR (Flash)	IR (Steady)
HS-407X	White (Steady)	IR (Flashing)
HS-408X	Green (Steady)	Red (Steady)
HS-410X	White (Steady)	Red (Steady)
HS-411X	Red (Flash)	IR (Steady)
HS-413X	Green (Flash)	Red (Flash)
HS-418X	White (Flash)	Blue (Steady)

Standard Body Color is Black. Add "T" to end of P/N for Tan Body.  
Other models with other functions are available upon request.

### HEL-STAR 4 EXO® Advantages

- **Safety** - Velcro interface provides an emergency peel-away feature reducing potential for injury caused by interference with parachute risers.
- **Security** - Positive visual and tactile confirmation of ON/OFF and function status. One touch turns the unit OFF. Positive confirmation of OFF avoids inadvertent ON status in the IR mode.
- **Simplicity** - The tactile sliding switches can be operated with a gloved-hand in the blind with the helmet donned.
- **Visibility**—White flash meets FAA 3-statute mile requirements; redesigned LED element provides full 180 degree side-visibility.
- **Long Life/Extreme Conditions** - Powered by a field-replaceable lithium 123 cell for long life and excellent cold temperature operation.
- **Waterproof** - Designed for waterproof operation at 66 feet plus.
