

The Aviator Life Vest

Thin. Light. Simple.

The new Switlik Aviator Life Vest is specifically designed to maximize comfort while seated in an aircraft. It's the vest you'll forget you're wearing.

The low profile design The new interior cell folding technique combined with our open V-Neck design allows the Aviator to lay over your shoulders relieving the pressure on your neck during those long flights.

The simple reliable dual breakaway zipper design provides immediate inflation when activated. Backup oral inflation tubes are conveniently located on either side of the vest and easily reached through the side access flaps.

Red, beaded handle in the center of the vest offers the best visibility in low light and easy approach for deployment. The breakaway safety feature eliminates the risk of snagging.

Specifications

Weight: 1 lbs 5 oz (595.3g)
