

# The most comfortable crew vest

Lighter. Distributed load. Ergonomic design.

The new Switlik X-Back Air Crew Vest is a quantum leap in comfort and durability over its predecessors. Specifically designed for constant wear in the seated position in a helicopter or fixed wing aircraft. It's the vest you'll forget you're wearing.

The X-Back is ergonomically fitted to the shoulder contour for a perfect fit and weight distribution for vastly improved comfort. The adjustable X-Back straps allows the range to make it one size fits all.

The simple reliable dual breakaway zipper design provides immediate inflation when activated. Backup oral inflation tubes are conveniently located on either side of the vest and easily reached through the side access flaps.

The exterior cover is constructed from a blended Nomex®/Kevlar® Rip-stop weave fabric. Provides excellent durability, a soft feel and protection against fire.

The system lets you customize your vest with the accessories you need. contoured cut of the MOLLE side panels locates the accessories away from the midsection providing more room for shoulder and lap belts while enhancing comfort.
